

Chennai 23/3/2020

Dear clients,

We are living in extraordinary times with the COVID-19 virus affecting our lives in so many ways. Many parts of the world are in lock-down and the situation evolve on day-to-day basis. In this situation we prioritise the health and safety of our staff while we do our best to serve our clients with the same standards as we always do!

The Indian government declared a national lock-down starting from midnight on 24/3 which will last for the next 21 days. This means that all international passenger flights are cancelled, state borders are closed and we are not allowed to leave our houses for anything but essential business such as buying food. A few essential services are exempted.

All our employees have laptop and are working from home. However, our redundant servers supported with reserve power from our solar panels and lithium batteries and multiple internet providers means that it is business as usual for us apart from working from all over the city and in some cases across Tamil Nadu.

The number of active cases in India as I write is around 819 whereof 36 in our state and totally 19 deaths. Given India's population this may not sound high however the Indian government wants to ensure that the disease is managed in an early stage.

I want to take this opportunity to express my sincere gratitude to all our staff as they work tirelessly to continue the same service level and our clients.

We are still open for business, please contact us if you need any help with IT development!

Stay safe!

Mikael Gislén

Managing Director
